

Re: Brooks Runkle

Redline Design Group

To Whom It May Concern,

We had the pleasure of being introduced to Brooks Runkle of Redline Design Group, over the past two years through several different resources. We were intrigued by his portfolio when we had the opportunity to see his projects while visiting our athletes at the Nascar Race Teams we serve. Keystone Partners, Chase Monroe, Jim Thorpe, and Andrew Laing highly recommended his professionalism, personal commitment to service and ability to stay within a budget while executing a project of the most exceptional style.

When we have been brought possibilities to meet our growing needs, we have had the opportunity to work closely with Brooks and watch him take the time to learn about our practice, understand our needs and then design space within constraints. He incorporates our personal style and stays true to our vision for service to our patients and our practice. He has strong experience in the health care field and also has the ability to design space that is LEED certified. He is a man of the most impeccable character; we have been impressed with the confidentiality with which he treats our professional relationship. For all of these reasons, we truly feel he/his work do exemplify the mission statement of Novant Health, to promote a remarkable patient experience.

If we can answer any questions or be of any further assistance, please do not hesitate to call.

Sincerely,

Jerry L. Barron M.D.

H. David Homesley M.D.
